

**ADDENDUM NO 1 TO BIDDER INFORMATION MATERIALS
BID # 2019-01 – SUPPLY & INSTALL INTERACTIVE EQUIPMENT**

This Addendum No. 1 amends, modifies, and supplements the City of Alabaster Board of Education’s Bidder Information materials for this bid that previously was published on or about January 24, 2019. The provisions in this Addendum No. 1 are incorporated into those materials, and, to the extent any herein are inconsistent or conflict with those previously published, those herein supersede, govern and control. Except as modified herein, all provisions in the Invitation for Bids and Bidder Information materials remain in effect.

1. The following additional information is provided as points of clarification or in response to previous inquiries:
 - A power outlet is installed in the ceiling of each room at the former Thompson High School. Thompson Middle School does not have power outlet in the ceiling of every room.
 - No additional power outlets will be installed by the Board or the successful Contractor. Existing power outlets must be used.
 - At Thompson Middle School, the Contractor will be responsible for removing old technology (i.e. mounted projectors, poles, etc.) in rooms.
 - There are two (2) Ethernet data cables installed in each room at the former Thompson High School and Thompson Middle School. Ethernet cables may be used to connect panel/projector to the network.

2. In addition to other Equipment to be supplied for Fixed Solution A (Short Throw Projector) and Fixed Solution B (Set Back Projector), the successful Contractor also shall supply the following items and comply with the below specifications for those Solutions:
 - 35ft or 50ft, Active HDMI cable, or Monoprice HDMI cable (product # 3571) or equivalent.
 - Ethernet Patch cables, 10ft, Color - Blue, PC5-BL-10 or equivalent.
 - USB cabling and connectors needed for touch capability.
 - Mounting Extension Pole should be 12 inches.
 - Contractor should include in its prices for Fixed Solutions A & B any other cabling, equipment and parts needed to complete installation.

3. The following specifications apply for the Mobile Solution:
 - Mobile Stand for 46in to 75in Panel, Promethean APTMS-03 or equivalent.
 - Ethernet Patch cables, 10ft, Color - Blue, PC5-BL-10 or equivalent.
 - Contractor should include in the prices for the Mobile Solution any other cabling, equipment and parts needed to complete installation.

/s/ Anthony Kingston, Coordinator of Technology, ACS
